Becky Weber

Margaret Ann Watkin Award

This honor is traditionally given to juniors who display not only academic excellence in the biology major but a genuine passion for biology and learning. This award also recognizes service to the department, the positive attitude and contributions that the students bring to the classroom, and enthusiasm for research. The Biology Department views the Watkin Scholar as a student who pursues biology for its own virtue and provides an excellent role model for other students. Congratulations on your record of high achievement!
