

The Denison University Department of Physics and Astronomy invites applications for 2 tenure track assistant professor positions preferably starting Fall, 2010, although a later start may be considered under exceptional circumstances. Ph.D. required. We are seeking candidates vitally interested in teaching physics at both the beginning and advanced levels including laboratory-based courses. The successful applicant is expected to carry out active research with the involvement of undergraduates. Substantial start-up funds for research will be available, and Denison supports generous professional and family leave programs. Denison University is a highly-selective liberal arts college of 2100 students, located in Granville, Ohio, 30 minutes from Columbus. The department consists of seven faculty, a technical assistant, and an academic administrative assistant. Facilities include excellent equipment for both teaching and research, first class on-site experimental labs, a link to the Ohio Supercomputer, an observatory, a planetarium, and a well-equipped machine shop. Additional information may be obtained from our web site at <http://www.denison.edu/physics/>. Applicants should submit vita, graduate school transcripts, a description of teaching interests and experience, a proposed research plan including the means for involving undergraduates, and three (3) letters of reference online at <https://employment.denison.edu>. Applications received by October 15, 2009 will receive full consideration; applications may be accepted until the position is filled. Denison's commitment to foster a diverse community is central to our liberal arts mission, therefore candidates from traditionally underrepresented groups are strongly encouraged to apply.
